Subject:—

Revision of rates of royalty on china clay or kaolin.

M In Government Notification No.G.8568/Geol.47-16-3 dated 20th December 1916, the marginally
1. on crude china clay 4as per ton, noted rates of royalty on china
2. on kaolin washed or prepared from china clay. 12as per ton. clay were published for the in-
formation of the public. The
N rates were fixed tentatively for a period of two years.

2. A report from the Director of Geology was called for as re-
gards the rates of royalty that may be levied on the said mineral in
future.

Later under disposal
3. The Director reports that the industry in kaolin is still in
its infancy but that there are already favourable indications that it
may thrive well in future. It is not, however, until a much greater
amount of work has been done and more experience gained, that suffi-
cient and reliable information can be gathered as regards the value
of kaolin available in the State. He reports that the present rates
of royalty may be increased, tentatively for a period of two years,
to 12 annas per ton in the case of crude china clay and to Rs.1-8-0
per ton on kaolin washed or prepared from china clay.

*Para 647 of
the rules.*
4. The recommendation of the Director has been agreed to by the
Members of Council. The proposed rates may be approved.

18th December 1918.

BANGALORE, 29th October 1918

No. 1056

FROM

B. JAYARAM, Esq., F.G.S.,
Offg. Director, Department of Geology,
Mysore State.

13521

To

C.S. Balasundaram Iyer, Esq., F.A.,
Chief Secretary to the Government of
His Highness the Maharaja of Mysore.

SIR,

With reference to your letter No. G.5496 - Geol.34-18-1, dated 14th September 1918, calling for my opinion in regard to the rates of royalty that may be levied on china clay or kaolin in future, I have the honour to state as follows:-

Although the present rates of royalty on kaolin have been in force since the 20th December 1916, we have not as yet, been able to obtain much valuable information as to the market price of our kaolin. During the past two years 1916-17 and 1917-18 a total number of nine prospecting licenses were issued for kaolin, but it is only under five of them that active work has been carried on upto date. The total quantity of kaolin collected by the several licensees during the said two years is 2706 tons. The whole of the material removed was crude and the royalty paid to Government is Rs. 480/- at 4 annas per ton.

With regard to the value of the kaolin removed, different figures have been furnished by different licensees and they range from Rs. 3/- to Rs. 10/- per ton. In some cases these values include the cost of the extraction of kaolin and its transport to the working factories. The material removed has not been sold, but used

208

We have therefore no satisfactory data upon which any reasonable proposals for a revision of the present rates of royalty can be based. The industry in kaolin is still in its infancy in Mysore, but there are already favourable indications that it may thrive well in future. It is not however until a much greater amount of work has been done and more experience gained, that we shall be in possession of sufficient and reliable information in regard to the value of our kaolin. In view, however, of the great interest and activity that have already been evidenced in respect of kaolin by several of the holders of prospecting licenses and also in consideration of the fact that kaolin is likely to be required by the Department of Industries and Commerce for the manufacture of porcelain and other industrial purposes, I am of opinion that the present rates of royalty may be increased, tentatively for a period of two years, to 12 annas per ton in the case of crude china clay *and to Rs. 1-8-0 per ton on kaolin washed or prepared from china clay.* Up to date no washed kaolin has been removed from the blocks by any of our licensees, but the provision of royalty at an enhanced rate in respect of the washed material appears desirable and necessary in order to meet any future cases in which any of the licensees or lessees may prefer to wash the material on the block and remove the washed kaolin.

I have the honour to be,
Sir,
Your most obedient Servant,

B. T. Davis.
Offg. Director,
Department of Geology.
